

SmartFarmer - IoT Enabled Smart Farming Application

Stages	Entry	Engage	Exit
Thinking	<div>If it is really working properly?</div> <div>How to check or confirm it?</div>	<div>The moisture level is changing</div> <div>The motor is ON/OFF automatically</div>	<div>No need to worry about irrigation for crops</div>
Doing	<div>Open the Mobile Application</div> <div>Monitor the Temperature, moisture, etc.,</div>	<div>Set motor mode to Auto/Manual</div> <div>Control the motor state</div>	<div>Confirm the motor mode</div> <div>Close the mobile Application</div>
Experience	<div>It was little bit confusion</div>	<div>Easy to monitor soil moisture and control motor in any place</div>	<div>Belive the system will work fine</div> <div>Crops definitely have the correct moisture level</div>
